

La Perla™ Eleganza® Rose
Rosa 'KORpenparo'

Height: 4 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 6b

Group/Class: Hybrid Tea Rose

Description:

An outstanding rose presenting large, cupped, pearly-cream blooms that are fully double, with ruffled petal edges; needs full sun and well-drained soil; good disease resistance

Ornamental Features

La Perla Eleganza Rose features showy fragrant fully double creamy white cup-shaped flowers with buttery yellow centers at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour.

Landscape Attributes

La Perla Eleganza Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

La Perla Eleganza Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

La Perla Eleganza Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
